

# FleetView

## Device Lifecycle Management

Data-driven, intuitive, secure

# Connect and reduce Total Cost of Ownership

## The power of remote service data

Getinge devices all have their unique data to share. By connecting them to FleetView, you collect all that data as actionable information in one easy-to-use web application, paving the way for streamlined services, device uptime, less stress, and reduced costs.

# Data-driven Device Lifecycle Management

## Real-time data Real-time impact

FleetView offers a complete view of your installed base of connected equipment, providing secure real-time service data and usage statistics that empower informed decision-making.

With this wealth of information at your fingertips, you can plan maintenance with precision, optimize performance, and ensure your devices are always ready to perform when needed.

⊕ Smarter maintenance

⊕ Optimized utilization

With this wealth of information at your fingertips, you can plan maintenance with precision, optimize performance, and ensure your devices are always ready to perform when needed.

Smarter maintenance

Optimized utilization

## Smarter maintenance

Applying FleetView facilitates a more proactive approach to maintenance. The user-friendly interface simplifies scheduling, ensuring your equipment receive timely care tailored to its actual usage patterns. The result is fewer disruptions and a smoother workflow.

# Data-driven Device Lifecycle Management

## Real-time data Real-time impact

FleetView offers a complete view of your installed base of connected equipment, providing secure real-time service data and usage statistics that empower informed decision-making.

With this wealth of information at your fingertips, you can plan maintenance with precision, optimize performance, and ensure your devices are always ready to perform when needed.

 Smarter maintenance

 Optimized utilization

## Optimized utilization

Leverage device usage statistics to uncover hidden efficiencies in your device utilization. FleetView's built-in analytical tools identify opportunities to enhance production, lower emissions and reduce workloads, fostering a more sustainability and efficient approach.

# Intuitive access and navigation

Effortless experience  
Exceptional control

Access FleetView easily from any web-enabled computer, tablet, or smartphone. The user-friendly interface makes it effortless to navigate large amounts of service data and statistical insights from any number of devices.

**Instant access. Anytime. Anywhere.**

Stay connected to your devices from wherever you are with FleetView's remote capabilities. Whether at your work station or on the go, you can proactively manage your equipment, saving time and ensuring optimal performance.

# Discover FleetView

## Monitor your machines and boost service capabilities

The personalized dashboard provides a comprehensive overview of your connected devices, as well as the possibilities to drill down per device and get actionable data.

Benefit from digitized diagnostics and support, including alarms, immediate service notifications, and remote troubleshooting guidance by Getinge experts – ensuring you can take immediate action and avoid costly downtime.

These basic views help you navigate and find your way with ease.

# Making life easier for biomed

## Ensuring device performance

FleetView empowers biomedical engineers and service technicians, as well as supporting staff in general, by helping cut routine tasks, maximize uptime, and enhance cost control.

With FleetView by your side you can ease your workday and focus on what matters most – ensuring devices are ready to perform when needed. Everytime.

## Ensuring readiness with reliable power

Make sure your equipment is ready to perform when needed, allowing you to focus on the tasks that matters the most.

# Trouble-free operations, every step on the way

## Improve efficiency

Whether you work in the Operating Room, Intensive Care Unit, Sterile Reprocessing Department, or Life Science Research Labs, FleetView is your partner in smooth operations and streamlined device management. Ultimately removing all guesswork and creating a future of certainty and efficiency.

A man with glasses and a mustache, wearing blue scrubs, stands with his arms crossed in front of a large, colorful sign for 'CHILDRENS HOSPITAL'. The sign features various child-like drawings on the letters. The background shows a modern hospital building with large windows.

CHILDRENS  
HOSPITAL

*“Getting a heads-up when preventive maintenance is approaching, or a warning when something is about to go wrong, helps us avoid canceling procedures.”*

Brendan Kelly, critical care scientist at Royal Belfast Hospital for Sick Children where all installed Flow-i anesthesia machines are connected to FleetView.

# Create a smart network for your entire facility

## Connect devices, users, and operations

Imagine having a seamless, remote overview and a unified maintenance plan for all Getinge devices across your entire organization. Every user. Every department. Every facility.

With FleetView, you can make that vision a reality. A large majority of our innovative products spanning all categories are primed for connection. Additionally, your installed base of Getinge devices can easily be integrated, enabling a comprehensive device data network, improving operational efficiency and staff satisfaction.

## Ensure Contamination-Free Lab Operations

FleetView provides accurate usage and service data, enabling research laboratories to streamline workflows and further enhance contamination-free experiments and tests.

# Robust security brings peace of mind

For the safety of your data

Rest assured knowing that FleetView meets the standards of security and compliance to meet international requirements and support your digital transformation journey.

# Ensuring confidence, integrity and availability of data

## No patient data displayed

The safety of FleetView's device connections is ensured through a robust cryptographic protocol, and no patient data is presented in the portal. Neither access nor changes can be made to the devices via the network, and our security protocols protect against breaches.

- No patient data is displayed in the application, only device data and usage statistics
- Cybersecurity standard ISO 27001 with the privacy extension standard ISO 27701
- Regular Penetration Testing to identify and fix vulnerabilities

Comprehensive  
IT security features

Contact your local Getinge representative to access our [White Papers on IT security](#).

## Ensuring Secure Communication and Data Integrity

- **Cybersecurity standards:** ISO 27001 with the privacy extension standard ISO 27701.
- **Encryption** - All data transmitted between Getinge equipment, and our cloud servers is encrypted using TLS protocols.
- **Authentication:** Mutual authentication ensures that both sender and receiver are trusted.
- **No PHI:** Our solution does not handle Protected Health Information (PHI), ensuring patient privacy is maintained.

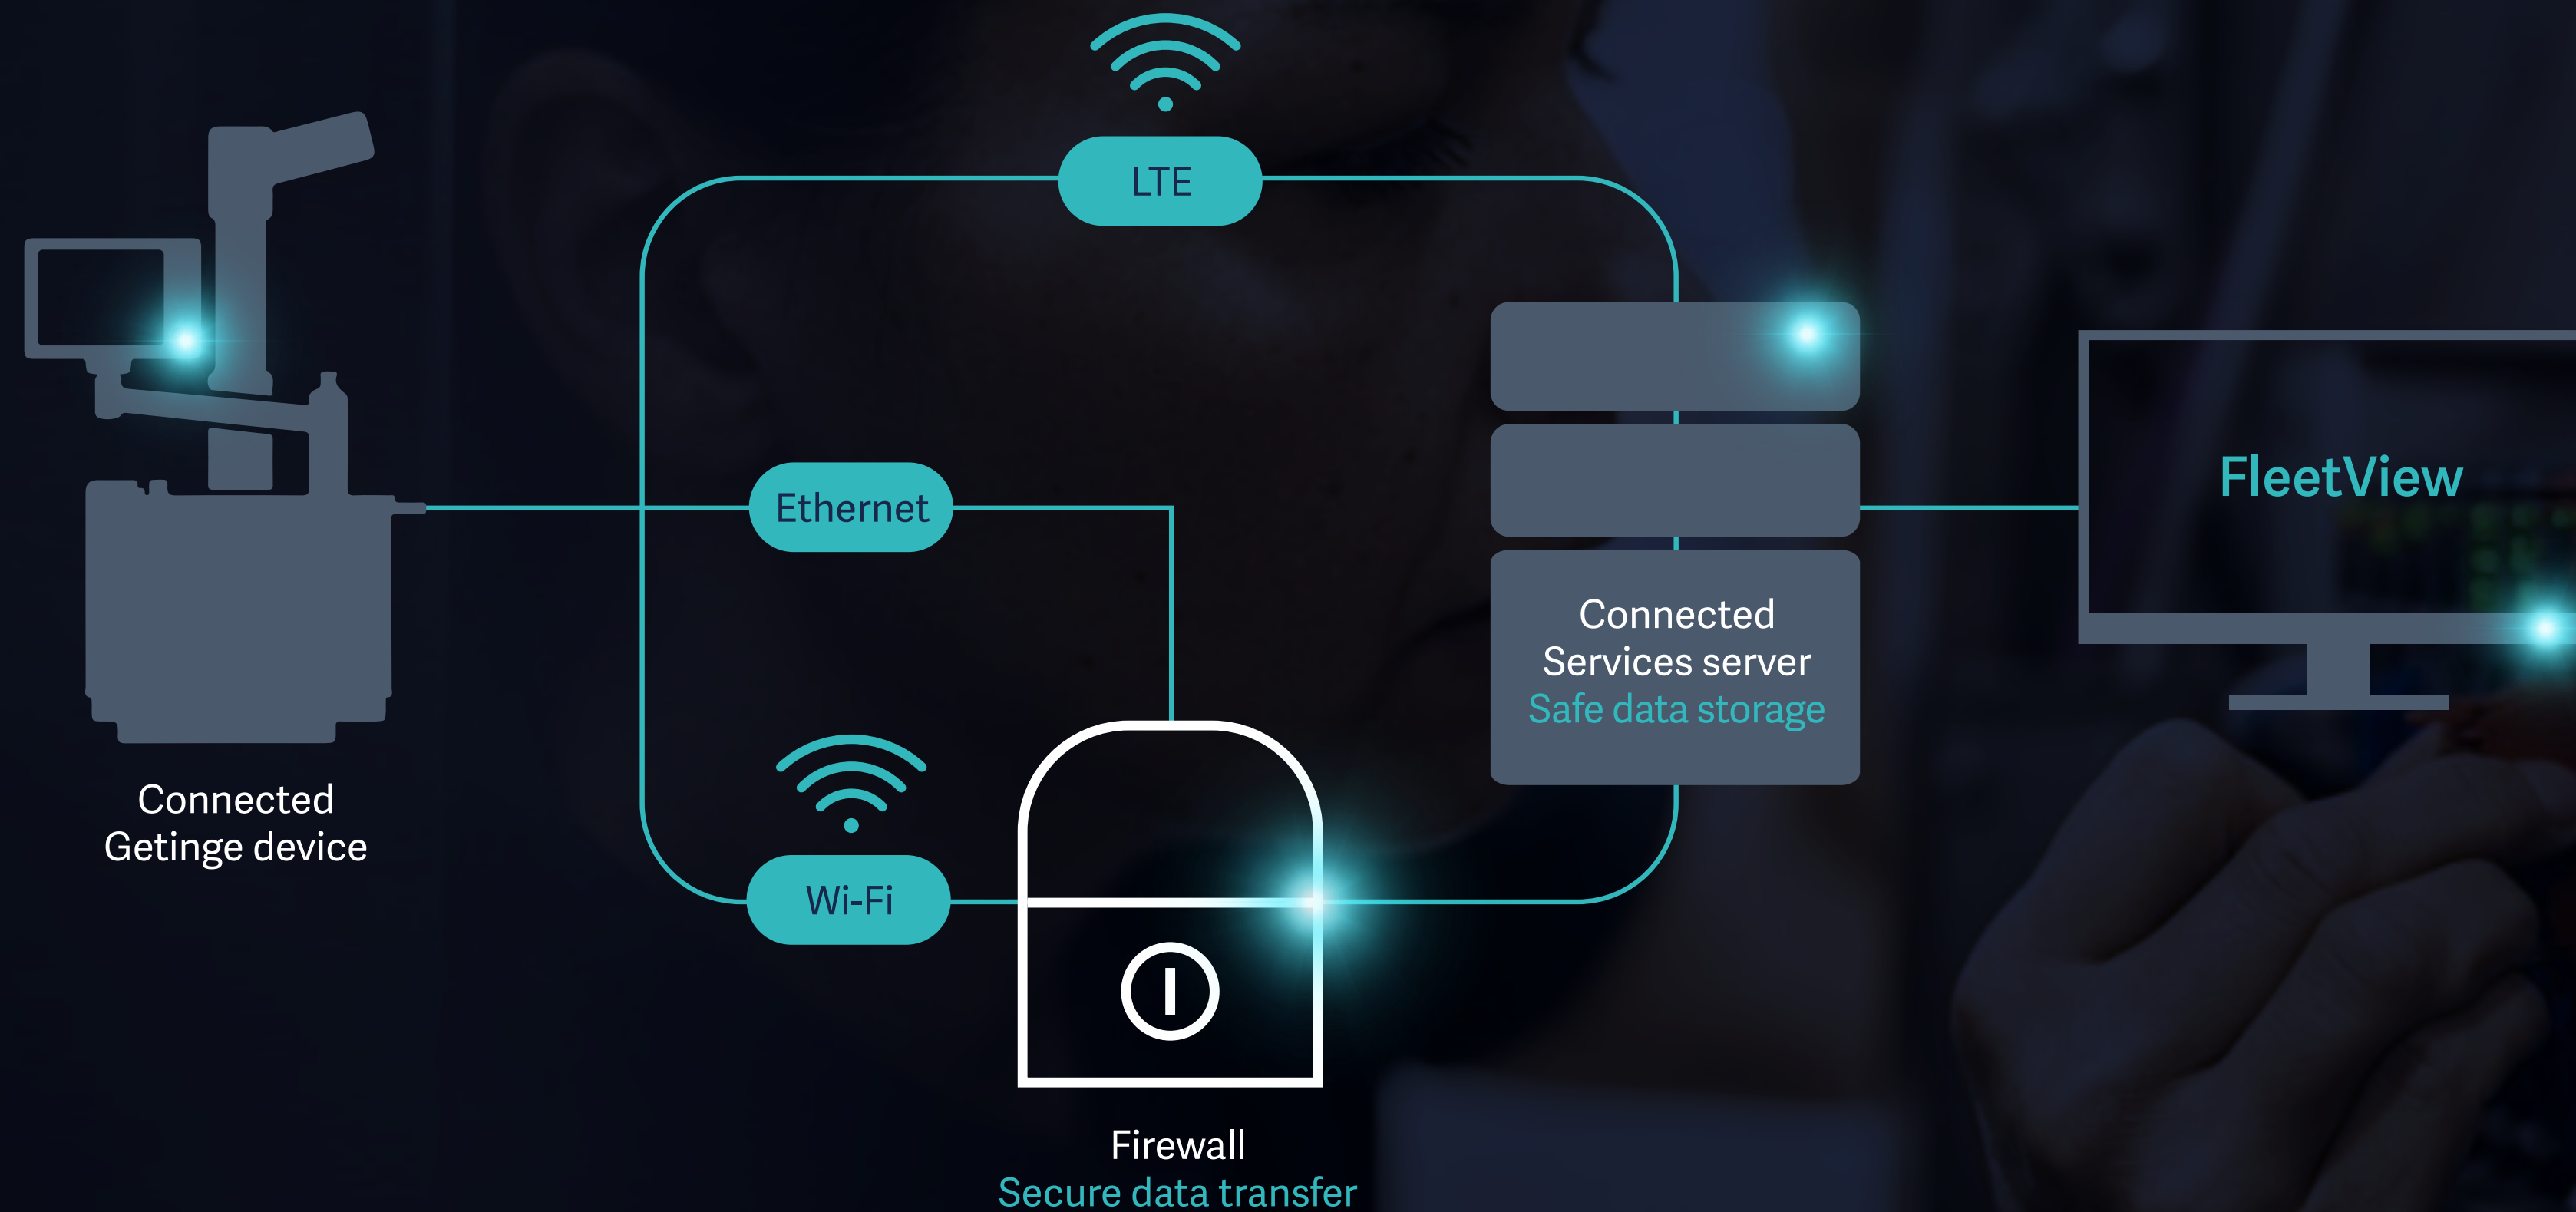

## Secure and Reliable Server Management

- **Certified Data Centers:** Hosted on ThingWorx™ technologies in ISO-certified and SSAE 16 audited data centers.
- **User Management:** Uses Okta and ADFS for secure user authentication and management.
- **Regular Penetration Testing:** Annual independent penetration testing to identify and fix vulnerabilities.

## Seamless Integration with Existing Network Security

- **Firewall-Friendly:** Devices initiate communication using HTTPS on port 443, requiring no changes to existing firewall settings.
- **No Public IPs:** Devices do not have public IP addresses, reducing exposure to external threats. Device will be part of the hospital network, not having public exposure.
- **Easy Deployment:** Leverages existing security infrastructure, minimizing setup complexity for local IT.

# How to connect

For more detailed info how to connect your Getinge devices, please contact your local Getinge representative.

# Connect to the future of device lifecycle management

Drawing from our global healthcare and life science experience and more than 25 years of pioneering software development, we can offer a connected solution tailored to your needs.

Get in touch today to know more about how FleetView can revolutionize service efficiency, empower smarter decision-making, ease staff strain, and help you deliver better care with reduced effort.
