

Getinge Clean Enzymatic Plus

Multi-enzymatic detergent

A multi-functional pH neutral detergent for medical device cleaning

Getinge clean Enzymatic Plus brings additional functionality to our wide range of detergents. Its powerful formulation is designed to operate effectively in manual, ultrasonic and washer disinfectant applications.

With four enzyme types and a balanced surfactant package, the product easily removes soil from instruments and devices and exhibits biofilm removal properties. It has wide materials compatibility with metals, plastics and elastomers.

In washer disinfectors, enhanced foam control ensures efficient cleaning by maximizing pressure during the washing phase.

In manual cleaning, solutions of Enzymatic Plus are completely transparent in a wide range of water qualities and at all temperatures to ensure complete visibility of cleaned items, improving safety.

Available in 5L, 25L and 205L containers
