Anytime. Anywhere.

GETINGE

Improve uptime in the ICU and OR

Getinge Online connects people, products, services and ideas. It gives digital access to equipment data, enabling you, your team and hospital to **gain insights** and **maximize uptime**. All to **improve efficiency** in the intensive care unit and operating room. Be proactive, save valuable time and focus on the tasks that matters most – connect your Servo-u/n/air ventilators and Flow Family anesthesia machines to Getinge Online.

Equipment data when you need it

By connecting your Getinge devices, you allow your department to make use of intelligence and knowledge within equipment. A digital service developed in close collaboration with our customers, biomeds and clinicians, to help you transfer and access the data whenever you want. Wherever you are.

When logging in to your personal web portal, Getinge Online helps you find and solve service issues from a distance. It also gives you the possibility to reach data on how your units are used, i.e. monitoring the anesthetic agent usage to help you reduce the environmental footprint. Everything presented on a role-based dashboard.

»Getinge Online is rooted in the insight that connectivity will make a difference in health care. The idea is to analyze all available data and gain insights that will make life easier for our customers. Together as one, we're changing healthcare.»

Annica Jämtén Ericsson, Director Service and Connectivity Strategy at Getinge.
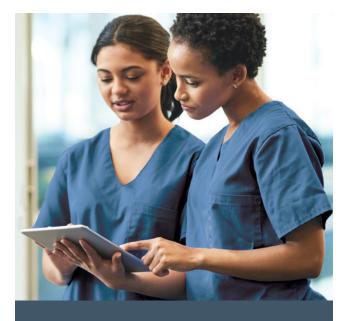

Stay one step ahead and maximize uptime

Getinge Online offers instant access to device data, which makes it faster and easier for service teams to troubleshoot issues and work out a solution. It includes individualized perspectives on service needs and remote support from experts, all over the world.

The service improves asset management by providing an easy overview of installed base status and service history. It also gives an indication when preventive maintenance is due. Information that will ease the life for a biomed and ensure equipment uptime.

From better insight comes improved efficiency

Our online service is a great example of the benefits that connectivity brings to healthcare. By transforming small information to big data, Getinge Online makes it easier for clinicians and their team to adhere to protocol and be more efficient and proactive. For example by viewing and analyzing data like fresh gas flow and ventilation modes. All in the interests of a hospital.

It gives the clinician the opportunity to define best practice and use data as a training tool, for instance; you can view a longer timeline to identify trends, compare year-to-year data and much more. Anytime. Anywhere.

How does Getinge Online work?
Service and equipment data from connected devices is securely transferred to a server. You login to the Getinge Online customer portal to view and analyze data from a role-based dashboard.
