

Workshop: Intra-Aortic Balloon Pump

The why, when and
who of mechanical
circulatory support

This comprehensive one-day study workshop is designed for health care professionals who are directly involved with the care of the patient requiring Intra-aortic Balloon Pump (IABP) therapy.

A combination of theory and interactive group sessions will enable the participant to apply theoretical knowledge to clinical practice in a safe environment.

Upon completion the participants will have a greater understanding of the physiological effects achieved by IABP therapy, be able to identify relevant indications and contraindications for using counter pulsation and apply the concepts of IAB insertion, device set-up, operation and response to alarm condition.

2025 Perth Registration Details

Date: Wednesday 9th July

Time: 8:30am to 4:30pm

Location: Fraser Suites Perth,
10 Adelaide Terrace, East Perth, WA, 6004

Pricing: \$250 Early Bird
\$290 Regular Price

What this workshop includes:

Course Outline

- Welcome and introduction
- Principles of IABP support
- IAB Catheter type, sizing and placement
- Therapy indications and contraindications
- Arterial pressure waveform analysis and timing assessment
- Trigger type and application
- Getinge modes of operation
- Getinge specific algorithms
- Factors Affecting Diastolic Augmentation
- Complications of IABP therapy
- Patient care and assessment
- Cardiac arrest management

Skill Stations

- Getinge IABP device orientation and set up
- Cardiosave Transport considerations
- IAB Waveform interpretation and assessment
- IABP troubleshooting and alarm response
- Cardiosave

ACN
