

Torin SmartView

The digital door sign for the operating room

Create a smooth OR workflow with Torin SmartView. This digital door sign gives a transparent overview of planned surgeries and progress updates for current procedures in each OR. Torin SmartView is designed to simplify OR coordination and improve workflows inside and outside the operating room.

The digital door sign provides real-time updates of comprehensive OR information and avoids unnecessary disruptions during a surgical procedure. With the help of our digital solutions for hospitals, you can improve the efficiency of your facility. Optimise your day-to-day surgical workflow with Torin SmartView, allowing healthcare professionals to focus on providing the best possible patient care.

OR scheduling

Change status in OR

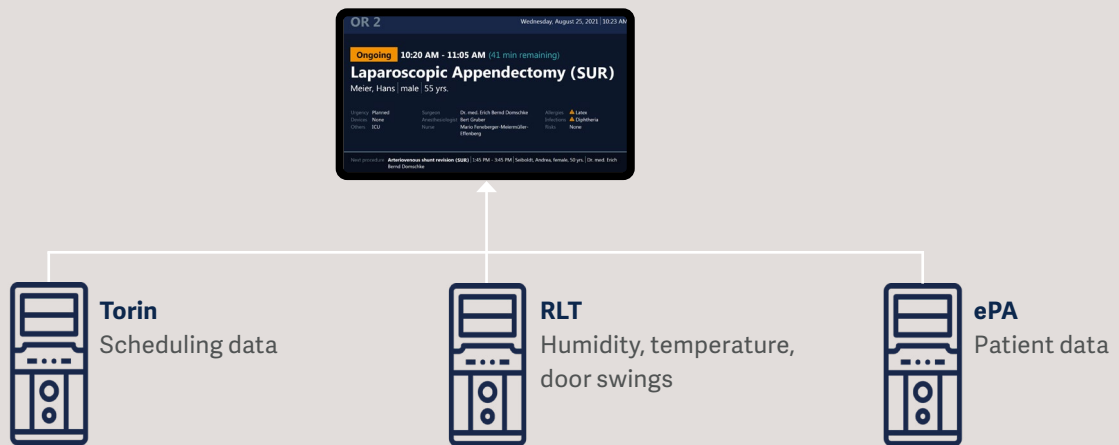

Everything at a glance

Torin SmartView provides you with a helpful digital solution to display the current status around an operating room. It displays the current procedure type, progress, performing staff, allergies, infections, risks, equipment used, and information relevant to efficient surgical workflow.

With updated information readily available staff can get back to what is really important: providing excellent patient care.

Integration into existing IT solutions

Torin SmartView can be integrated into your existing hospital IT landscape, including the electronic medical record (EMR), your Torin software solution, or your heating, ventilation, and air conditioning systems (HVAC).

Configurable display

You decide which information should be displayed on the digital door sign. Torin SmartView can be easily configured according to your individual needs. Customize the sign to meet your specific needs by freely selecting the location of key information within the display, Torin SmartView is included in the Torin Progress solution of the Torin OR Management suite.

Please contact your local Getinge representative for more information about the Torin SmartView solution.

Benefits

- Current procedure status keeping everyone informed
- Enables a reduction of the number of OR door swings
- Designed to improve surgical asepsis to prevent postsurgical infections
- Transparency for the OR staff to support a smooth surgical workflow
