Rinse

Cart Washer

Washer/
Disinfector

Product Specification

Description

A surfactant-based rinse aid for use in washer-disinfectors and cart washers to reduce drying time by up to 9 minutes and achieve spot-free rinsing of medical devices. Suitable for use on stainless steel, ceramics, glass, and resistant soft metal surfaces. Rinse Aid will not interfere with steam or ethylene oxide sterilization.

Application

For aiding the sheeting of rinse water to speed drying and leave instruments spot-free. Refer to equipment and instrument/device manufacturers' instructions before use.

Key Features

- Suitable for automated cleaning processes
- Increases sheeting action—Surfactant-based formula lowers the surface tension of water so it easily slides off surfaces
- Reduces spotting and shortens drying time—Water slides off surfaces faster, reducing unsightly spots and drying instruments more quickly
- Faster processing—Testing on Getinge washers has shown a decrease in drying time of up to 9 minutes
- Steam and EtO permeable—Does not interfere with the sterilization process
- Environmentally friendly—Biodegradable formulation and recyclable packaging

Ingredients

Blend of surfactants and pH regulator.

Storage Information

Store in a cool, dry place protected from frost and away from alkalis and strong oxidizing agents. Store upright in original containers. Optimum storage temperature 41°F–77°F/5°C–25°C

Cautions

- Do not use on polycarbonate material
- Check material (for instance polysulphone (PSU, PPSU) and similar materials) for compatibility before use
- Do not mix with other chemicals
- Always wear correct PPE
- Refer to Safety Data Sheet (SDS) for further safety and handling

Environmental Awareness

Biodegradable formulation and recyclable packaging.

Dispose of contents and container in accordance with local, regional, national, and international regulations.
